“Be the change that you want to see in the world.”

Summary

9+ years of experience, over the years I have had the opportunity to work hands on in a variety of roles and bring a range of experience to help technical teams be better, whether that is through management and leadership, devops, or software development.

I focus on people and growth, with a passion for coaching individuals on their technical, personal and professional development and facilitating environments that fosters a culture of effective collaboration, continuous improvement and innovation with the aim of guiding the teams to see past the conventional.
